LIST OF CONTENTS

NUMBER 1

L. L. Perez Tumini, P. C. Florido, M. M. Sbaffoni, M. J. Abbate, L. A. Mai and J. R. Maiorino — 1 Study of a TANDEM fuel cycle between a Brazilian PWR (Angra-I) and an Argentinian CANDU (Embalse)

S. K. Ghorai, P. M. Sylva, J. R. Williams and W. L. Alford — 11 Partial neutron cross sections for ^{64}Zn, ^{66}Zn, ^{67}Zn and ^{68}Zn between 14.2 and 18.2 MeV

M. Giménez, M. Schlamp and A. Clausse — 17 Analysis of the spatial distribution of aerosol dispersions

Y. P. Mahlers — 29 Core loading pattern optimization based on simulated annealing and successive linear programming

M. Antonopoulos-Domis, S. Kadi and K. Mourtzanos — 39 Departure from linearity of neutron cross-spectra phase in BWRs

Technical Notes

Wilson J. Vieira and Paul N. Stevens — 51 Analysis of the sampling distribution in Monte Carlo radiation transport calculations

G. C. Bakos and N. F. Tsagas — 57 Penetration of multi-energy γ-rays through double layer shielding slabs

N. Sathyabama, P. Mohanakrishnan and S. M. Lee — 61 Estimate of total control rod worth based on lower dimensional modelling

I Guidelines for the preparation of typescripts for direct reproduction

NUMBER 2

H. A. Ozgener — 67 A reconsideration of the Goertzel–Greuling approximation for anisotropic scattering

Youn-Myoung Lee and Kun Jai Lee — 71 Nuclide transport of decay chain in the fractured rock medium: a model using continuous time Markov process

Marcos Pimenta de Abreu, Fernando Carvalho da Silva and Antonio Carlos Marques Alvim — 85 Transverse net leakage into the second-order Nodal Expansion Method

J. DEVOOGHT and P. E. LABEAU — 97 Moments of the distributions in probabilistic dynamics

P. E. LABEAU and J. DEVOOGHT — 109 Synthesis of multivariate distributions from their moments for probabilistic dynamics

Technical Notes

G. C. BAKOS — 125 Improvement of build up factors for multi-energy γ-rays penetration through Al, Fe and Pb shield combinations

J. ZABADAL, M. VILHENA and L. BARICHELLO — 131 Solution of the three-dimensional one-group discrete ordinates problems by the LTSN method

I Guidelines for the preparation of typescripts for direct reproduction

NUMBER 3/4

GEE YONG PARK and POONG HYUN SEONG — 135 Application of a fuzzy learning algorithm to nuclear steam generator level control

N. MORISHIMA and Y. AOKI — 147 Evaluation of cold neutron scattering cross sections for light and heavy water

G. C. POMRANING and ANIL K. PRINJA — 159 Advection-diffusion as an asymptotic limit for transport in anisotropic media

R. T. ACKROYD, O. A. ABUZID and A. M. MIRZA — 181 Discontinuous finite element solutions for neutron transport in X–Y geometry

MUSA YAVUZ — 203 A one-D simplified discrete-ordinates method with no spatial truncation error

A. DUBI and N. GURVITZ — 215 A note on the analysis of systems with time dependent transition rates

HEUI JOO CHOI, KUN JAI LEE and CHANG LAK KIM — 249 Assessment of water-filled borehole as a preferred pathway penetrating radioactive waste repository

261 Book Review

263 Current Papers in Nuclear Energy

I Erratum

NUMBER 5

MADELINE ANNE FELTUS	267	An extended discharge burnup optimization technique using Penn State's Fuel Management Package and CASMO-3/SIMULATE-3
MADELINE ANNE FELTUS and ERIC T. BEAUMONT	275	RETRAN-02 MOD5 and RETRAN-03 code benchmarks for Beaver Valley plant transients and FSAR analyses
JUNG-DO KIM, CHOONG-SUP GIL and HARK RHO KIM	283	Application of recent iron evaluations of ENDF/B, JEF and JENDL to neutron transport calculations through light water reactor pressure vessel
A. A. HARMS, B. W. AUGENSTEIN and N. S. RABOTNOV	291	Nuclear energy: in search of a paradigm shift
G. C. BAKOS	297	Angular properties of the scattered photons for combined 1.43 and 2.75 MeV source photons penetrating single and double-layer shields
M. SULTAN, E. ELSHERBINY and M. SOBHY	303	A method for neutron transmutation doping of silicon in research reactors
B. MAHALAKSHMI and P. MOHANAKRISHNAN	311	A two grid acceleration scheme for the nodal diffusion equation in hexagonal geometry
Technical Note A. GALPERIN, P. GRIMM and V. RAIZES	317	Modelling and verification of the PWR burnable poison designs by ELCOS code system
	327	Current Papers in Nuclear Energy
	I	Press Release from the NRPB

NUMBER 6

TORU OBARA and HIROSHI SEKIMOTO	331	Feasibility of zero temperature coefficient core with highly diluted fuel and graphite moderator
THOMAS J. DOWNAR and DAVID A. PHEGLEY	339	Harmonic perturbation theory for the analysis of boiling water reactor regional instabilities
R. S. MODAK, D. C. SAHNI and S. D. PARANJAPE	359	Evaluation of higher K-eigenvalues of the neutron transport equation by S_n-method
MAN GYUN NA	367	Design of a steam generator water level controller via the estimation of the flow errors

I. PÁZSIT 377 Determination of reactor stability in case of dual oscillations

M. MILOŠEVIĆ, M. PEŠIĆ, S. AVDIĆ and D. NIKOLIĆ 389 A comparative study of effective delayed neutron fraction

G. VERDÚ, D. GINESTAR, V. VIDAL and J. L. MUÑOZ-COBO 395 A consistent multidimensional nodal method for transient calculations

Letter to the Editor
J. D. LEWINS 411 Reactivity oscillations and stability with delayed neutrons

415 Book Reviews

417 Current Papers in Nuclear Energy

NUMBER 7

Y. NAGAYA and K. KOBAYASHI 421 Solution of 1-D multi-group time-dependent diffusion equations using the coupled reactors theory

MOON-HEE HAN, GYU-SEONG CHO, KUN-JAI LEE and MOON-HYUN CHUN 441 Spherical approximation in gamma dose calculations and its application to an emergency response action at Kori reactor site in Korea

R. L. BUCKLEY, S. K. LOYALKA and M. M. R. WILLIAMS 453 Numerical studies of solute transport in a fractured medium subject to near- and non-equilibrium mass transfer

J. M. PARATTE and R. CHAWLA 471 On the physics feasibility of LWR plutonium fuels without uranium

R. KOZMA and K. NABESHIMA 483 Studies on the detection of incipient coolant boiling in nuclear reactors using artificial neural networks

Technical Note
F. BUTUIRAT and M. KIEŁKIEWICZ 497 Comparison of two approximate methods of aerosol dynamics

503 Current Papers in Nuclear Energy

NUMBER 8

ALEX GALPERIN 507 Utilization of light water reactors for plutonium incineration

TERUAKI OHNISHI — 513 Possible chaoticity for the time series of the amount of nuclear information released by the newsmedia

MARK W. LLOYD and MADELINE ANNE FELTUS — 523 Statistical core design methodology using the VIPRE thermal–hydraulics code

YOSHIHIRO YAMANE and YAMATO HAYASHI — 533 Count-loss effect due to time interval between counting-gates in Feynman-α method

WITOLD DZWINEL, YURIY PEPYOLYSHEV, PAVEL JIRSA and JIŘÍ REJCHRT — 543 Comparison of noise diagnostic systems based on pattern recognition and discriminant methods

Technical Note

G. C. BAKOS and N. F. TSAGAS — 553 Angular exposure dose build up factors for combined energies source of disc geometry

Letter to the Editor

YIGAL RONEN — 559 Prediction of the average number of prompt neutrons from fissioning of some actinides

561 Current Papers in Nuclear Energy

NUMBER 9

M. S. VAN DEN BERG — 565 Thermodynamic parameters and transport coefficients of the U–C–F gas mixture in the steady flow gaseous core fission reactor

SANJAY GUPTA, FEROZ AHMED and SURESH GARG — 585 A simulation study of a proposed blanket design for a D–T fusion reactor

H. S. LIM, K. M. LEE, M. Y. OHN, N. H. LEE and J. H. CHOI — 593 Validation of CATHENA against the CS28-1 high temperature experiment under an impaired cooling condition

K. M. LEE, M. Y. OHN, H. S. LIM, J. H. CHOI and S. T. HWANG — 601 Study on models for gap conductance between fuel and sheath for CANDU reactors

Technical Notes

K. S. CHANG and D. J. LEE — 611 An experimental investigation of the air entrainment in the shutdown cooling system during mid-loop operation

M. A. SULTAN and M. E. KATTAB — 621 Parametric study for optimization of the specific cost of installed electric power in nuclear plants

NUMBER 10

KANCHHI SINGH and VINOD KUMAR	629	Reconstruction of pin power in fuel assemblies from nodal calculations in hexagonal geometry
TOSHIHIRO YAMAMOTO and BENAN BASOGLU	649	Optimal geometry for fuel solution sloshing based on the boundary perturbation theory
D. MENEGHETTI	659	Coolant temperature trends in EBR-II reflector subassemblies
C. YÍLDÍZ and E. ALCAN	671	The effect of strong anisotropic scattering on the critical sphere problem in neutron transport theory using a synthetic kernel
Technical Note		
J. D. LEWINS	681	The adiabatic Fuchs–Nordheim model and non-dimensional solutions
	I	Guidelines for the preparation of typescripts for direct reproduction

NUMBER 11

BRIGITTE STROHMAIER	687	Model calculations of excitation functions of neutron-induced reactions on Rh
MULYANTO and ASASHI KITAMOTO	697	Grouping of HLW in partitioning for B/T (burning and/or transmutation) treatment with neutron reactors based on three criteria
S. ZAKI and H. SEKIMOTO	711	Safety aspect of long-life small safe power reactors
W. ROTHENSTEIN and R. DAGAN	723	Two-body kinetics treatment for neutron scattering from a heavy Maxwellian gas
H. SCHOONEWELLE, T. H. J. J. VAN DER HAGEN and J. E. HOOGENBOOM	731	Theoretical and numerical investigations into the SPRT method for anomaly detection
	743	Current Papers in Nuclear Energy
	I	Guidelines for the preparation of typescripts for direct reproduction

NUMBER 12

A. RÁCZ — 747 An improved single sensor parity space algorithm for sequential probability ratio test

M. T. SISSAOUI, J. KOCLAS and A. HÉBERT — 763 Solution of the improved and generalized quasistatic methods by Kaps and Rentrop integration scheme with stepsize control

F. E. JATUFF — 775 Error estimators and adaptivity for the neutron diffusion problem

G. C. POMRANING and B. D. GANAPOL — 787 Asymptotically consistent reflection boundary conditions for diffusion theory

Letter to the Editors
AQUILINO SENRA MARTINEZ — 819 Remarks on the use of a corrected formula for the neutron flux in a heterogeneous lattice cell

823 Book Review

825 Current Papers in Nuclear Energy

I Guidelines for the preparation of typescripts for direct reproduction
